Food Reviews International, 10(4), 477–478 (1994)

AUTHOR INDEX TO VOLUME 10

A

Adleh, B., 419–436
Anderson, K., 177–193
Arya, S. S., 71–91
Aselage, J. M., 207–214

B

Barfield, C. S., 215–267
Brunner, J. F., 135–157

C

Campbell, J. B., 195–205
Criswell, J. T., 177–193
Cunfer, B. M., 159–175
Cuperus, G. W., 177–193

E

Erickson, R. E. (book review), 377–379

F

Fargo, W. S., 177–193
Fung, D. Y., 357–375

G

Garg, S. K., 313–355

H

Hari, R. K., 49–70

J

Jaby El-Haramein, F., 419–436
Johri, G. N., 313–355

K

Kenkel, P., 177–193
Konrad, G., 287–312

L

Lieske, B., 287–312

M

Maga, J. A., 1–48, 273–286, 385–418
Martin, A. M., 49–70

N

Noyes, R. T., 177–193

P

Patel, T. R., 49–70, 93–107

S

Singh, R. K., 71–91, 437–473
Swisher, M. E., 215–267

T

Thakur, B. R., 71–91, 93–107, 437–473

V

Vogl, T. P. (book review), 269–270

Z

Zehnder, G., 119–134

Food Reviews International, 10(4), 479–481 (1994)

SUBJECT INDEX TO VOLUME 10

A

Agriculture
  changes in, relationship of food policy to farm policy in, 217–223
  history of, 223–227
Applications, of food irradiation, 456–462

B

Bacterial rennets, 319–321
Baked potato flavor, 18–24
Biochrome pigments, synthesis of, 65–67
Biological systems, pigment production in, 49–70
Boiled potato flavor, 15–18
Bread, in Syria, 419–436

C

Carotenoid pigments, in biological systems, 51–56
Cattle, IPM in, 196–200
Cereal crops, IPM in, 159–175
Chymosin, recombinant calf, 340–344
Color
  See Pigment production
Components, of food, effect of irradiation on, 449–456

D

Dairies, IPM in, 200–201
Dehydrated potato product flavor, 30–38
Discoloration, pink, in cooked white meat, 273–286

E

Eggplants, glycoalkaloids in, 387
Endemic pest management, 227–233
Extruded potato product flavor, 39–40

F

Farm policy, relationship of to food policy in agricultural change, 217–223
Feed lots, IPM in, 200–201
Fish, sorbates in, 93–107
Flavonoid pigments, in biological systems, 60–63
Flavor
  of meat, protein hydrolysis and, 287–312
  of potato, 1–48
Food industry, applications of pigment production in biological systems to, 49–70
Food policy, relationship of to farm policy in agricultural change, 217–223
French fried potato flavor, 30
Fruit crops, tree, IPM in, 135–157
Fungal rennets, 321–333

G

Genetic nutrition (book review), 269–270
Glycoalkaloids, in solanaceae, 385–418

H

N-Heterocyclic biochrome pigments, in biological systems, 59–60
History, of IPM, 215–267

I

Immobilized rennet, 336–340
Indolic biochrome pigments, in biological systems, 58–59
Integrated pest management (IPM)
  historical context and internationalization of, 215–267
  in livestock production, 195–205
  in mid-south processor, 207–214
  in stored products, 177–193
  in tree fruit crops, 135–157
  in vegetables, 199–134
  in wheat and cereal crops, 159–175
Internationalization, of IPM, 215–267
Ionizing radiation, sources of, 439–441
IPM. *See* Integrated pest management (IPM)
Irradiation, of food
  chemistry and application of, 437–473
  factors influencing effects of, 444–449

L

Livestock production, IPM in, 195–205

M

Meat
  cooked white, pink discoloration in, 273–286
  protein hydrolysis and flavor of, 287–312
Mechanism of action, of ionizing radiation, 441–444
Microbial rennets, 319
Microbiology, food, rapid methods and automation in, 357–375
Milk clotting, mechanism of, 334–336
Models, global, of pest management, 223–239

N

Nonvolatiles, potato, 13–15

P

Pests. *See* Integrated pest management (IPM)
Pigment production, in biological systems, 49–70
Plant rennets, 317–318
Plants, bioactive volatile compounds from (book review), 377–379
Potato chip flavor, 24–30
Potatoes
  flavor compounds in, 1–48
  glycoalkaloids in, 387–397
Potato processing waste volatiles, 41–42
Potato sprout volatiles, 40–41
Processor, mid-south, IPM in, 207–214
Protein engineering, of rennet, 344–345
Protein hydrolysis, and meat flavor, 287–312

Q

Quinone pigments, in biological systems, 63–64

R

Raw potato volatiles, 2–13
Rennet, current trends and future research, 313–355

S

Sensory qualities, effect of food irradiation on, 462–463
Solanaceae, glycoalkaloids in, 385–418
Sorbates
  chemistry of, 71–91
  in fish and fish products, 93–107
Stored products, IPM in, 177–193
Swine units, IPM in, 200–201
Syria, bread in, 419–436

T

Tetrapyrrole pigments, in biological systems, 56–57
Tomatoes, glycoalkaloids in, 408–411
Toxicity, of glycoalkaloids in solanaceae, 407–408
Training, for pest management, research-driven, 239–245

Tree fruit crops, IPM in, 135–157

V

Vegetables, IPM in, 199–134
Volatiles
  potato sprout, 40–41

raw potato, 2–13

W

Wheat, IPM in, 159–175
